

# SIX SIGMA

HEAVY DUTY  
NUTRUNNERS

**5 Year Warranty  
On All Heavy  
Duty-Global  
Class  
Nutrunners**

Our line of nutrunners come in a variety of configurations to meet all your manufacturing needs:

Single or Multi Spindle

Articulating Arms

Smart Arms

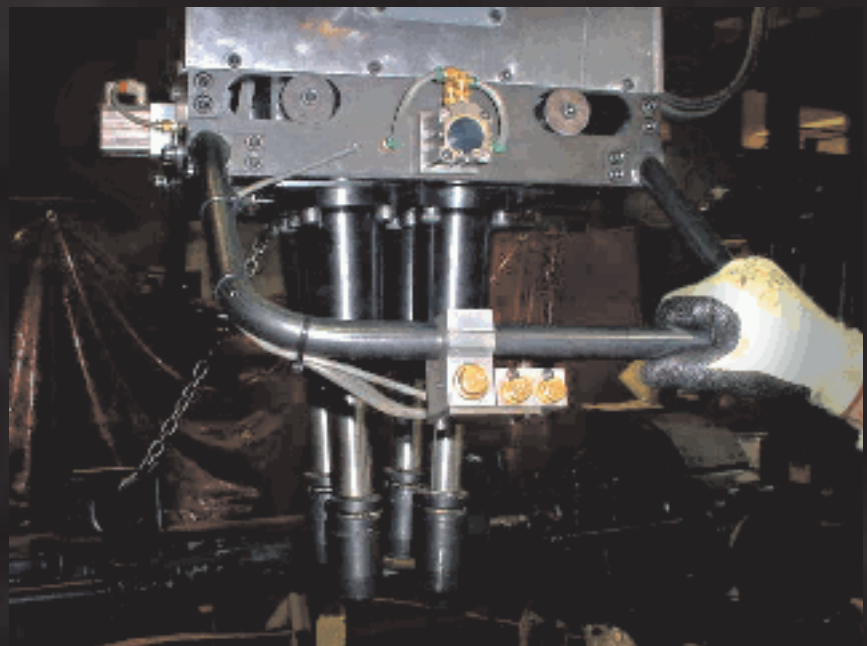

Jib Mount

Single or Multi Spindle Pogo

Horizontal or Vertical Mount

Variable Bolt Centers

We produce our own torque transducers that have been designed for full compensation for temperature and isolation to ensure accuracy.

We manufacture our own spindles and can produce a drive that will meet any specification that you require. We also have a quick-change socket option for our square drives. We utilize Baldor

motors and Seib and Meyer controllers in our nutrunners. We also employ a variety of gearboxes depending on the needs of the application and even manufacture our own line of quality gearboxes. So we are sure to have a gearbox that can meet your needs.

---

Six Sigma has been one of the industry leaders in torquing applications since 1985. Our devices have been proven time and time again. Our tools have become known for their robustness, power, and repeatability. Our team of engineers has spent countless hours perfecting the designs of our line of gearbox, spindles, and transducers.
